**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim1-23, drawn to a power source , classified in class 290, subclass 1C.
  - II. Claims 24-34, drawn to control the torque electronically , classified in class 290, subclass 25.
  - III. Claims 35-47, drawn to control system for electrical energy transiting signal to crank assembly, classified in class 290, subclass 38c.
  - IV. Claims 57,58, drawn to a first and second power source, classified in class 290, subclass 32
2. Inventions I,II,II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I and II and III have separate utility. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I,II, is not required for Group III,IV restriction for examination purposes as indicated is proper.
4. A telephone call was made to Applicant representative on 06/18/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
